No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1992 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

Contents of Volume 42

NUMBER 1, JANUARY 1992

ANGELA D. FRIEDERICI AND LYN FRAZIER. Thematic Analysis in Agrammatic Comprehension: Syntactic Structures and Task Demands.....	1
MICHÈLE GENTIL. Variability of Motor Strategies.....	30
PATRICK McNAMARA, LORAIN K. OBLER, RHODA AU, RAYMOND DURSO, AND MARTIN L. ALBERT. Speech Monitoring Skills in Alzheimer's Disease, Parkinson's Disease, and Normal Aging.....	38
CHRISTINE CHIARELLO, LORIE RICHARDS, AND ALMA POLLOCK. Semantic Additivity and Semantic Inhibition: Dissociable Processes in the Cerebral Hemispheres?.....	52
JENNIFER HORNER, DEBORAH V. DAWSON, ALBERT HEYMAN, AND ALICE MCGORMAN FISH. The Usefulness of the <i>Western Aphasia Battery</i> for Differential Diagnosis of Alzheimer Dementia and Focal Stroke Syndromes: Preliminary Evidence.....	77
HEIDI M. FELDMAN, AUDREY L. HOLLAND, SUSAN S. KEMP, AND JANINE E. JANOSKY. Language Development after Unilateral Brain Injury.....	89
PAPERS TO APPEAR IN FORTHCOMING ISSUES	103

NUMBER 2, FEBRUARY 1992

ANDRÉ ROCH LECOURS, FRANÇOIS CHAIN, MICHEL PONCET, JEAN-LUC NESPOULOUS, AND YVES JOANNETTE. Paris 1908: The Hot Summer of Aphasiology or a Season in the Life of a Chair	105
RONALD L. BLOOM, JOAN C. BOROD, LORAIN K. OBLER, AND LOUIS J. GERSTMAN. Impact of Emotional Content on Discourse Production in Patients with Unilateral Brain Damage	153
S. LALANDE, C. M. J. BRAUN, N. CHARLEBOIS, AND H. A. WHITAKER. Effects of Right and Left Hemisphere Cerebrovascular Lesions on Discrimination of Prosodic and Semantic Aspects of Affect in Sentences.....	165
MORRIS COHEN, GEORGE HYND, AND KENNETH HUGDAHL. Dichotic Listening Performance in Subtypes of Developmental Dyslexia and a Left Temporal Lobe Brain Tumor Contrast Group	187
ALEXANDRA REHAK, JOAN A. KAPLAN, AND HOWARD GARDNER. Sensitivity to Conversational Deviance in Right-Hemisphere-Damaged Patients	203
PAPERS TO APPEAR IN FORTHCOMING ISSUES	218

NUMBER 3, APRIL 1992

MARYANNE WOLF AND MATEO OBREGÓN. Early Naming Deficits, Developmental Dyslexia, and a Specific Deficit Hypothesis.....	219
CHRISTOPHER HERTZOG, ROGER A. DIXON, AND DAVID F. HULTSCH. Intraindividual Change in Text Recall of the Elderly.....	248
T. ORTIZ, F. J. EXPOSITO, F. MIGUEL, M. MARTIN-LOECHES, AND F. J. RUBIA. Brain Mapping in Dysphonemic Dyslexia: In Resting and Phonemic Discrimination Conditions.....	270
W. FREDERICK WETZEL AND DENNIS L. MOLFESE. The Processing of Presuppositional Information Contained in Sentences: Electrophysiological Correlates.....	286
MARY JO GERMANI AND ROBERT S. PIERCE. Contextual Influences in Reading Comprehension in Aphasia	308
ALEXANDRA REHAK, JOAN A. KAPLAN, SALLY T. WEYLMAN, BRENDAN KELLY, HIRAM H. BROWNELL, AND HOWARD GARDNER. Story Processing in Right-Hemisphere Brain-Damaged Patients.....	320
JACK GANDOUR, SUVIT PONGLORPISIT, FUANGFA KHUNADORN, SUMALEE DECHONGKIT, PRASERT BOONGIRD, AND RACHANEE BOONKLAM. Timing Characteristics of Speech after Brain Damage: Vowel Length in Thai	337
PAPERS TO APPEAR IN FORTHCOMING ISSUES	346

NUMBER 4, MAY 1992

MURRAY GROSSMAN, SUSAN CARVELL, MATTHEW B. STERN, STEPHEN GOLLOMP, AND HOWARD I. HURTIG. Sentence Comprehension in Parkinson's Disease: The Role of Attention and Memory	347
ORLANDO J. ANDY AND SUBHASH C. BHATNAGAR. Stuttering Acquired from Subcortical Pathologies and Its Alleviation from Thalamic Perturbation.....	385
LIZHAO WANG AND HAROLD GOODGLASS. Pantomime, Praxis, and Aphasia.....	402
RACHELLE SMITH DOODY, RICHARD A. HRACHOVY, AND EDWARD P. FEHER. Recurrent Fluent Aphasia Associated with a Seizure Focus.....	419
LEWIS P. SHAPIRO, PATRICK McNAMARA, EDGAR ZURIF, SUSAN LANZONI, AND LAIRD CERMAK. Processing Complexity and Sentence Memory: Evidence from Amnesia	431
KATHRYN A. BAYLES, CHERYL K. TOMOEDA, AND MICHAEL W. TROSET. Relation of Linguistic Communication Abilities of Alzheimer's Patients to Stage of Disease	454
PAPERS TO APPEAR IN FORTHCOMING ISSUES	473
AUTHOR INDEX FOR VOLUME 42	474

Information for Contributors

Brain and Language publishes original research articles, case histories, critical reviews, and scholarly notes; each contribution will be concerned with human language or communication (speech, hearing, reading, writing, or non-verbal modalities) related to any aspect of the brain or brain function. Each will have theoretical import, either formulating new hypotheses, or supporting or refuting new or previously established ones. The interdisciplinary focus includes the fields of neurology, linguistics, neurophysiology, psychology, neuroanatomy, psychiatry, neurosurgery, and speech pathology. Manuscripts of several different types are solicited: regular articles, single or multiple case history studies, critical reviews of books of interest to the journal's readership, and short (limited to under 10 pages typed) scholarly notes and comments discussing issues of topical interest.

Submission of Manuscripts. Manuscripts should be submitted to:

Brain and Language
Editorial Office
Third Floor
1250 Sixth Avenue
San Diego, California 92101

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Brain and Language* represent the opinions of the author(s) and should not be construed to reflect opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of Manuscript. Authors should submit manuscripts in *quadruplicate* (one original and three copies), typewritten, double-spaced on one side of 8½ × 11-in. white paper. The original and two copies of all artwork, tabular material, photographs, etc., must also be included. All pages should be numbered consecutively.

Page 1 should contain the article title, author(s) name(s) and affiliation(s), abbreviated form of the title for the running page heading (not to exceed 35 characters including letters and spaces), and the complete mailing address of the author to whom all correspondence should be sent. *Page 2* should contain a short *abstract* of approximately 100 words.

Papers must be written in English. Language data may be given in English when clearly identifiable, otherwise it should be transcribed into the phonetic alphabet of the International Phonetic Association (IPA).

Figures should be numbered in order of appearance (with Arabic numerals) and should have short descriptive captions (typed double-spaced on a separate page). Line drawings must be originals in black India ink on white paper, on polyester drafting film, or comparable glossy black and white photographs. Lettering should be uniform, professionally done, and large enough to be fully legible after a 50–60% reduction in printing. Illustrations in color can be accepted only if the authors defray the cost.

Tables should be numbered in order of appearance (with Arabic numerals): they should be typed double-spaced on a separate page. Each table should have a short descriptive title typed (double-spaced) above the table. Footnotes to tables (indicated by superscript lowercase letters, ^{a,b}, etc.) should be typed (double-spaced) at the end of the table. Keep in mind the dimensions of the journal when planning the number of columns in a table.

Footnotes to the text should be kept to a minimum; when necessary, they should be indicated by superscript Arabic numerals,^{1,2}, etc., cited consecutively throughout the article, starting with the title. They should be typed double-spaced on a separate page.

References should be cited in the text by surname of the author and the publication date in parentheses, e.g., Goldstein (1980) or (Russell & Espir, 1981). If more than one paper was published by the same author in a given year, the correct style is Broca (1982a) or (Broca, 1982b).

References should be listed alphabetically, typed double-spaced at the end of the article. All references cited in the text must be listed at the end of the paper. Journal titles should be written out in full, not abbreviated. Note the following examples.

Fromkin, V. 1980. *Errors in linguistic performance*. New York: Academic Press.

Efron, R., Snyder, E., Yund, E. W., & Martin, F. 1983. Central auditory processing. VI.

Detecting ear dominance by evoked potentials. *Brain and Language*, **20**, 54-64.

Bryden, M. P. 1978. Strategy effects in the assessment of hemispheric asymmetry. In G. Underwood (Ed.), *Strategies of information processing*. New York/London: Academic Press.

(Use underlining for journal and book titles only.)

Proofs. Proofs will be sent to the designated author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty (50) reprints without covers will be provided free of charge for articles. Additional reprints may be purchased; an order form will be included with proofs.

NeuroImage focuses on the visualization of all neuroscientific data. The journal intends to advance the state of knowledge of nervous system structure and function through the publication of articles describing neurobiological insights revealed through the use of imaging.

Original research articles on the application of imaging and image analysis in two main areas are published: where imaging is crucial to the biological question and reveals new information or insight; and where the imaging technique itself is innovative. The scope of research includes all types of imaging, image synthesis, and image analysis applied to basic research—from the whole-brain level to the subcellular and molecular levels.

MOLECULAR AND CELLULAR NEUROSCIENCES

Editor-in-Chief

P. Michael Conn

The University of Iowa College of Medicine, Iowa City

Editors

Lothar Jennes

University of Kentucky College of Medicine, Lexington

Robert A. Steiner

University of Washington, Seattle

- Publishes novel and original results in the areas of
neurobiology
neuropharmacology
neuroendocrinology
neurochemistry
neuroanatomy
at the molecular, cellular, and tissue levels
- Studies may be performed in animal and human
model systems so long as the fundamental observations
relate to basic science (as contrasted with clinical science)
- The journal is committed to prompt review and publication

Volume 3 (1992), 6 issues
ISSN 1044-7431
